

District II Control II

MODULAR CARPET

QUICKSHIP OPTIONS

District II + Control II

Inspired by the cartographer who draws the chart to navigate us through both familiar and uncharted territories, District II represents a carefully plotted blueprint of complex, multifaceted byways. Both graphic and neutral, with varying width accent stripes over a tonal field, District II makes a bold statement in commercial interiors.

Control II reimagines the circuitry and inner workings of computer hardware that link and connect us with the digital world. Like a motherboard, components and ports are arranged and conveyed in a broken crosshatch over warm and light backdrops, with occasional accented bands of color crossing over the charged pathways.

District II and Control II share 7 colorways, 4 neutral and 3 saturated colors in 24"x24" tile.

Due to the unique visual characteristics of modular carpets, pattern repeats and pattern run-off seams may appear more noticeable than in broadloom carpets. Such visual characteristics do not constitute a manufacturing defect, and as such, should be considered when selecting modular carpet and its installation. These photographs are representations of the installation for this modular product. Your modular installation may look different than these photos depending upon individual tile placement, lighting and overall space layout, including furnishings. Final tile placement and the resulting visual is thus the customer’s, and not EF Contract’s, responsibility.
