

Sentir[®] Odor Blocking Technology

Sentir is a self-renewing treatment designed for the control or elimination of offensive odors associated with various indoor environments, and it is especially beneficial with odor-bearing spills.

HOW DOES IT WORK?

Sentir is not a deodorant that masks offensive odors. It is a technology that absorbs and fragments the odor into component parts over a period of time, thus **destroying the odor itself**. Sentir is not decomposed by this action and is therefore ready to destroy the next odor molecule it encounters. The binding properties of Sentir provide **resistance to multiple cleanings** and heavy foot traffic, ensuring durability.

SENTIR STUDIES

The graph below illustrates the results of a study **Sentir's effectiveness in reducing ammonia-based odors**. The test included .4 grams of a 10% solution of ammonia dropped onto 3" x 3" carpet square. Within only one hour of elapsed time, the trace of ammonia in the air of the treated flooring **was reduced 68% more than the untreated flooring**.

WHAT IS THE COST?

Sentir may be added to any EF Contract carpet product. Please contact your EF Contract Sales Representative for pricing.
