## Pennant + Signet

As an expression of the emblems that identify our alliances, Pennant and Signet are instantly energizing with the drama of their geometric design.

Make your mark with Signet's bold cubist motif as intersecting lines merge to reveal layers of texture or fly your colors with Pennant's modern twist on a classic stripe. Both of these styles were created to be distinctive and refreshing; bound to making a statement in any interior space.

Pennant is available in 18"x36" planks and Signet as a 24"x24" tile. Constructed with TeraPlex® SD fiber, both styles feature a palette of 9 sophisticated colorways with quickship options.

PRODUCT DETAILS

Fiber

TERAPLEX® SD. EF Contract's TeraPlex® SD, produced by the world's most advanced carpet fiber extrusion process, is an advanced generation continuous filament PET fiber engineered for today's commercial flooring needs. It was created by leading polymer scientists and utilizes the most advanced PET resin to create carpet fiber with vibrant color, superior fade resistance, and longterm performance.

- Fiber thickness is 40% greater than conventional PET fiber for excellent crush resistance
- Higher purity and high molecular weight polymer resists abrasion and staining
- Solution dyed for superior colorfastness

Due to the unique visual characteristics of modular carpets, pattern repeats and pattern run-off seams may appear more noticeable than in broadloom carpets. Such visual characteristics do not constitute a manufacturing defect, and as such, should be considered when selecting modular carpet and its installation. These photographs are representations of the installation for this modular product. Your modular installation may look different than these photos depending upon individual tile placement, lighting and overall space layout, including furnishings. Final tile placement and the resulting visual is thus the customer's, and not EF Contract's, responsibility.
